

# BASSnet™ Inspection App

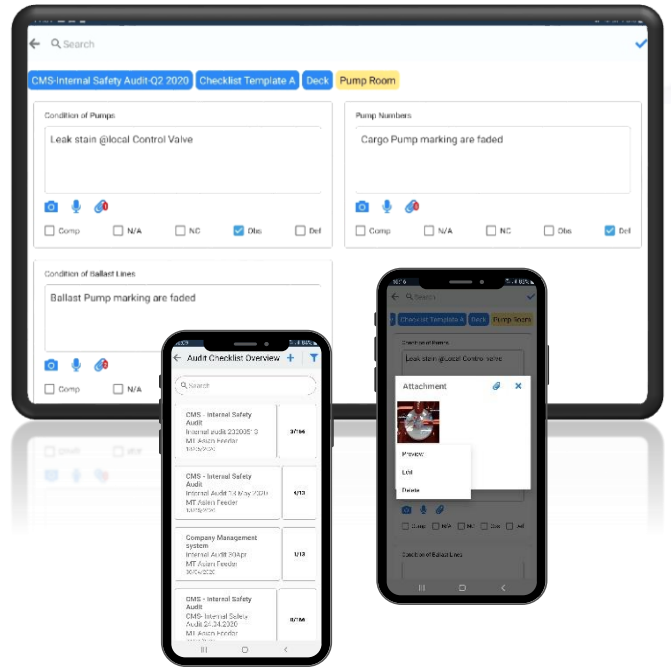

Go Digital with Audits &  
Inspections On Site

# Control audits and inspections in the palm of your hand

The BASSnet™ SAFIR module allows users to perform planned Inspections and Audits to track safety quality onboard vessels. With the convenient BASSnet™ Inspection mobile app, users can now also easily perform these checks at any location without the need for an internet connection. Data updated via the app can then be synced with the BASSnet™ database once the user is online.

Paperless tools are another plus. Both vessel and shore-based personnel (such as Officers onboard, Superintendents, Vessel Managers and HSEQ Auditors) can quickly and easily record findings on site by taking and uploading images and video recordings, with handy audio note-taking for instant commenting.

## What are the Benefits?

- ✓ Full integration with BASSnet™ SAFIR
- ✓ Instantly perform Inspections, Audits & Self-Assessments
- ✓ Essential offline availability
- ✓ Easy synchronisation with BASSnet database
- ✓ Audio note-taking for ease of commenting
- ✓ Upload helpful images and video recordings on site
- ✓ Ad-hoc recording of Findings for Event reporting
- ✓ Convenient access to predefined checklists/audit guide templates

With BASSnet™ Inspection app, enjoy a user-friendly, streamlined process to perform your audits and inspections.

# What are the key features?

## Audit and Inspect On-The-Go

- ◆ Perform audits and inspections on site in offline mode.
- ◆ Attach images, voice and video recordings.
- ◆ Helpful SAFIR checklists and audit guides (predefined).
- ◆ Transfer recorded data to the BASSnet™ Desktop.
- ◆ Easily assign resources for follow ups.

## Helpful Recording Tools

- ◆ Instantly upload captured photos and recorded videos during safety rounds and ship visits.
- ◆ Attach audio recordings for easy and quick commenting.
- ◆ Handy paperless tools for useful audio-visual documentation of Non-Conformities, Incidents and Near Misses.
- ◆ Synchronise with BASSnet™ Desktop.
